I'm a front-end developer who turns design ideas into responsive, user-friendly web interfaces. I enjoy building m

Projects & Experience

Front-end Developer (Self-Taught & Projects)

Remote · 2023–Present

- Built responsive web pages and mini apps using React, Next.js and Tailwind CSS.
- Implemented reusable components and clean folder structures for maintainable code.
- Integrated APIs (e.g. YouTube Data API) to show real data like videos and search results.
- Used React Router and Next.js routing for dynamic pages such as /search/:id and /video/:id.
- Worked with Git and GitHub to manage code and publish projects online.

Practice & Learning Projects

Remote · 2022–2023

- Created an event platform layout with Next.js, including event cards and detail pages.
- Built UI components such as navigation bars with hamburger menus, search bars and cards.
- Experimented with GSAP animations for hover effects and smooth transitions.
- Refactored code to improve readability, naming and component structure.

Education & Learning

Self-study Front-End Development (online courses, documentation, practice projects)

Technologies and Languages

- Languages: JavaScript, TypeScript (basic), HTML5, CSS3
- Frontend: React, Next.js
- Styling: Tailwind CSS, Bootstrap, CSS Modules
- State Management: React Hooks, Zustand, Redux Toolkit (basic)
- Back-end & DB (basic): Node.js, Express.js, MongoDB
- Tools: Git, GitHub, REST APIs, npm, VS Code, Figma (for reading designs)
